**Tatung Strengthens its High Definition Set Top Boxes Product Portfolio with Oregan's Media Browser****PRESS RELEASE**

CommunicAsia, Singapore Expo - June 22, 2006 — Tatung Co., a leading Taiwanese STB manufacturer, is rolling out its advanced range of Internet-connected Customer Premises Equipment for the telco, cable and satellite consumer services markets. The Internet browsing and video streaming features of its 2000 series IPTV set top boxes will be powered by the embedded browser solution from Oregan Networks – a UK-based software company that specializes in non-PC entertainment devices.

The 2000 series will include a variety of multi-featured appliances, ranging from High Definition IPTV STBs, hybrid IP + DVB STBs - to high end PVR units. Initially, the STB 2000 range will include a DVB-T tuner, with plans for subsequent offering of devices with ATSC tuners, as well as DVB-C or DVB-S2 capabilities. Owing to Tatung's manufacturing economies of scale and sophisticated design practices, the price point for the new STBs is highly competitive.

STB 2300, the spotlight of Tatung's demonstrations during the show, features stylish contemporary design and is packed with content connectivity options, such as Internet browsing and Digital Media Adaptor home networking functions, making it a fresh solution for the connected digital home market.

Luke Dang, Tatung's IPTV BU General Manager, said, 'Tatung believes that, as the digital home market is becoming more competitive, the end-to-end ecosystem integration is more important. To ensure leadership in advanced technologies, Tatung links up multiple platforms, such as browser, PVR, DLNA, DRM. Today, we are pleased to announce our collaboration with Oregan Networks.'

Tony Yang, Taiwan Business Manager at Oregon Networks, said, 'We are pleased to announce the licensing of our solution to Tatung, one of industry's most established and sophisticated hardware manufacturing incumbents. Tatung's understanding of the Internet technologies, combined with the expertise in development and customisation of high performance consumer devices, create powerful synergies between our companies. Oregon-powered hardware enables Tatung's customers to deploy cross-platform Internet, IPTV and home network connectivity seamlessly from an integration and interoperability perspective, whilst maintaining low costs and time to market. We regard this as an important milestone in strengthening Oregon's position in the Taiwanese device and services market.'

The new products: STB 2000 and STB 2300 - are demonstrated alongside Tatung's best-selling products, such as STB4000C, STB5000 and EG2000.

Tatung aims to provide complete market-ready STB solutions that allow fast development of its customers' IPTV service infrastructure. The company's goal is to empower its clients to enrich the end user's entertainment environment through high quality IPTV services, as well as making the process of extension of features and applications on Tatung's future STB effortless.

Tatung's versatile, reliable and affordable STB devices for the living room entertainment enhance the lifestyles of the consumer.

About Tatung

Established in 1918, Tatung Company currently owns 43 main subsidiary companies and reached \$7.5 billions USD in sales in 2005 (including invested companies). Its main products include computers, consumer electronics, home appliances, telecommunication products, wires and cables, and heavy industrial products.
