Accedo and Oregon partner to bring interactive applications to consumer electronics

Stockholm, December 20, 2005 -Accedo Broadband, a leading aggregator of TV-centric interactive gaming applications distributed over broadband, has partnered with Oregon Networks, the media browser company, to deliver Accedo's product portfolio on Consumer Electronics and Consumer Premises Equipment. Oregon and Accedo are planning continuous collaboration on integration of compelling web-based entertainment applications.

Accedo Application Portfolio™, compatible with Oregon Media Browser, will be demonstrated at Consumer Electronics Show 2006.

"Oregon's software solution bridges the gap between PC-based broadband entertainment and low-power Consumer Electronics. Oregon Media Browser's web content rendering capabilities, including Macromedia® Flash® compatibility, Dynamic HTML, and SSL for secure transactions, will provide an outstanding platform for us to make large parts of the Accedo Application Portfolio™ available across a number of networked consumer devices", says Michael Lantz, CEO, Accedo Broadband.

The Accedo Application Portfolio™ is presently the largest multi-platform collection of games, quizzes, puzzles, karaoke, plasma art, horoscope and comics for IPTV and connected consumer electronics. Oregon's standards-based software architecture provides the presentation mechanisms, business logic support and media playback for web-based applications, games, and audiovisual media.

"The Accedo Application Portfolio™ provides 'sticky', feature-rich arcade-style gaming applications, offering brand manufacturers and telco operators an easy-to-deploy platform for targeted online entertainment services. It is exciting to see the emergence of new applications and content like Accedo's. We feel positive that the growing broadband market shall enhance the entertainment functionalities of devices with more interactivity and personalisation", says Milya Timergaleyeva, VP Marketing of Oregon Networks.

About Accedo Broadband

Accedo Broadband is a leading aggregator of content and applications for IPTV and broadband-enabled consumer electronics. Accedo provides the largest available multi-platform portfolio of TV-centric applications, Accedo Application Portfolio™, containing e.g. games, quizzes, puzzles, art, comics, karaoke and music. Accedo works globally, but is headquartered in Stockholm, Sweden.
